

CTIA Over-the-Air (OTA) Audit successfully passed *Extension of test plan revision 2.2.2 to revision 3.1 completed*

Essen, Germany, 1st of August 2011 – CETECOM has demonstrated as one of the first laboratories worldwide a high-class expertise and state-of-the-art equipment in the field of newest OTA requirements like artificial hands, A-GPS and notebooks.

CETECOM is up-to-date in the matter of the new OTA RF performance specifications – all CTIA conform hand phantoms are available. We are pleased to serve the market needs by performing these new test requirements with the following artificial hand settings (each left and right):

- Hand phantom for brick-shaped (monoblock) phones
 - Hand phantom for clamshell (fold) phones
 - Hand phantom for PDA (wide) phones
 - Hand phantom for data (narrow phones) mode
- + Alignment tools and data mode fixture for hand phantom only

Furthermore the CDMA technology and knowledge at CETECOM passed the expert opinion and we are pleased to announce further extension of accreditation in this area.

- ENDS -

About CETECOM

CETECOM (www.cetecom.com) is renowned as neutral, experienced partner of the telecommunications and information technology industries and offers a unique service portfolio which covers the entire life cycle of a mobile communications product, contributes to the smooth running of products and applications and ensures that they meet international standards.

CETECOM's portfolio includes consulting and training, development of test solutions, validation services, testing in accredited laboratories (LTE, WCDMA, GSM, Application Enabler, OTA Performance, and EMC), field trials, certification, and approval handling.

Being a member of numerous specialist bodies, CETECOM is also actively involved in the development and standardisation of global specifications for future technologies.
